

Hyster

The high capacity unit H360HD2-EC4 forklift comes with the Cummins QSB6.7-155 diesel engine, a unique rear light cluster including turn signals, back-up and brake lights, along with hydrostatic load sense steering. This specific model is also equipped with a 3-speed powershift transmission, VISTA mast, open operator cab and wet disk brakes.

This empty container handler is agile and provides you the maneuverability, dependability and strength in order for you to be able to successfully and easily handle your toughest duty-cycle. The gas-spring gull wing doors and manual tilting cab make access to over 95 percent of the serviceable items easy and quick. The H360HD2-EC4 offers an excellent balance in total operator comfort, overall unmatched performance and unsurpassed serviceability.

The H190-360HD2 series offered by Hyster is the definition of excellence from start to finish. This unit offers the ComforCab II operator compartment with hydraulic controls, load sensing power steering and uncluttered floor design. The exclusive Vista Mast offers unparalleled visibility for the operator. Utmost attention to detail in the ergonomics department is put into each of these machines. The quality and dependability are all designed to help increase the output of your operators.

Side tilting capabilities also come equipped with the ComforCab II units. The transmission, engine in addition to other service check points are located conveniently to enable quick maintenance. This attention in the design enables daily service checks the ability to be completed in less than 10 minutes. This equates to a lower organization expense to your company.

The exclusive Vista masts are proudly showcased on this Hyster unit. The Vista mast comprises widely spaced channels and an overhead guard which help to provide excellent overall visibility unrivaled by others in the industry. The equipment's diagnostics part has also been simplified by introducing a top-of-the-line multi-function display panel. This particular panel provides at-a-glance information with a dual function LCD, 5 gauges and 16 warning lights.

Hyster is recognized globally for being devoted to providing their customers with an excellent family of material handling equipment. These kinds of machinery are built with the comfort and safety of the operator in mind. They have proven to be both reliable and dependable in even the most difficult conditions. Hyster remains innovative and consistent in their equipment designs. These types of machinery are built to last and get the task done efficiently and effectively. These are only a few of the reasons that the Hyster Company has become one of the leaders in the business.
